Subject Index of Volume 153

Abrasive friction
micro-mechanisms of wear – wear modes, 277
Alumina
the formation of aluminium hydroxide in the sliding wear of alumina, 201
Aluminium
effects of temperature and sliding velocity on the dry tribological characteristics of high purity, high density polycrystalline aluminium oxides, 351
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361
Aluminium hydroxide
the formation of aluminium hydroxide in the sliding wear of alumina, 201
Ash
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375
Asperities
an investigation of the interaction of model asperities of similar hardness, 245
Atomistic mechanisms
atomistic mechanisms of adhesive contact formation and interfacial processes, 3

Bifractal surfaces
elastic–plastic contact model for bifractal surfaces, 53

Carbon coatings
wear behaviour of i-carbon coatings, 149
Carbon steels
sliding friction and wear of plain carbon steels in air and vacuum, 163
Cavitation
mechanism of cavitation damage in thin liquid films: collapse damage *vs.* inception damage, 31
Cement
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375
Ceramics
characterization of porosity of ceramic coatings assigned to applications in seawater with the evolution of their electrochemical behaviour under friction, 387
the formation of aluminium hydroxide in the sliding wear of alumina, 201
wear behaviour of i-carbon coatings, 149
Chlorination
an investigation of film removal in extreme pressure lubrication using chlorinated hydrocarbon additives, 305
Chromium ferritic steel
oxidational wear modelling: (I), 179
Coal
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375
Coatings
wear behaviour of i-carbon coatings, 149
Cobalt
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375
Collapse
mechanism of cavitation damage in thin liquid films: collapse damage *vs.* inception damage, 31
Contact formation
atomistic mechanisms of adhesive contact formation and interfacial processes, 3

Deformation
an investigation of the interaction of model asperities of similar hardness, 245
Diamonds
the role of environment in the friction of diamond for magnetic recording head applications, 79

Elastic–plastic contact
elastic–plastic contact model for bifractal surfaces, 53
Elastohydrodynamic regimes
a study of parched lubrication, 91

the behaviour of transverse roughness in sliding elastohydrodynamic lubricated contacts, 107
Electrochemical behaviour
characterization of porosity of ceramic coatings assigned to applications in seawater with the evolution of their electrochemical behaviour under friction, 387
Extreme pressure lubrication
an investigation of film removal in extreme pressure lubrication using chlorinated hydrocarbon additives, 305

Failure analysis
mechanics and materials in fretting, 135
Ferrographs
research on an on-line ferrograph, 323
Fractal structure
elastic–plastic contact model for bi-fractal surfaces, 53
Fretting
mechanics and materials in fretting, 135
Friction
characterization of porosity of ceramic coatings assigned to applications in seawater with the evolution of their electrochemical behaviour under friction, 387
effect of roughness and sliding speed on the wear and friction of ultra-high molecular weight polyethylene, 331
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361
microscopic origins of the interface friction of organic films: the potential of vibrational spectroscopy, 263
sliding friction and wear of plain carbon steels in air and vacuum, 163
the role of environment in the friction of diamond for magnetic recording head applications, 79

Hydrocarbons
an investigation of film removal in extreme pressure lubrication using chlorinated hydrocarbon additives, 305

Inception damage
mechanism of cavitation damage in thin liquid films: collapse damage vs. inception damage, 31
Interface friction
microscopic origins of the interface friction of organic films: the potential of vibrational spectroscopy, 263
Interfacial processes
atomistic mechanisms of adhesive contact formation and interfacial processes, 3

Locomotive traction
the influence of track support structure and locomotive traction characteristics on short wavelength corrugations, 315
Lubrication
a study of parched lubrication, 91
the behaviour of transverse roughness in sliding elastohydrodynamic lubricated contacts, 107

Magnetic heads
the role of environment in the friction of diamond for magnetic recording head applications, 79
tribological studies of various magnetic heads and thin film rigid disks, 65
Micro-mechanisms
micro-mechanisms of wear — wear modes, 277
Molecular weight polyethylene
effect of roughness and sliding speed on the wear and friction of ultra-high molecular weight polyethylene, 331

Organic films
microscopic origins of the interface friction of organic films: the potential of vibrational spectroscopy, 263
Overstraining
mechanics and materials in fretting, 135
Overstressing
mechanics and materials in fretting, 135
Oxidation
oxidational wear modelling: (I), 179
Oxygen
effects of temperature and sliding velocity on the dry tribological characteristics of high purity, high density polycrystalline aluminium oxides, 351
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361

Parched lubrication
a study of parched lubrication, 91
Polycrystals
effects of temperature and sliding velocity on the dry tribological character-

istics of high purity, high density polycrystalline aluminium oxides, 351
Polytetrafluoroethylene
sliding wear mechanism of polytetrafluoroethylene (PTFE) and PTFE composites, 229
Porosity
characterization of porosity of ceramic coatings assigned to applications in seawater with the evolution of their electrochemical behaviour under friction, 387
Pressure variations
the behaviour of transverse roughness in sliding elastohydrodynamic lubricated contacts, 107

Roughness
effect of roughness and sliding speed on the wear and friction of ultra-high molecular weight polyethylene, 331
elastic–plastic contact model for bi-fractal surfaces, 53
the behaviour of transverse roughness in sliding elastohydrodynamic lubricated contacts, 107

Seawater
characterization of porosity of ceramic coatings assigned to applications in seawater with the evolution of their electrochemical behaviour under friction, 387
Short wavelength corrugations
the influence of track support structure and locomotive traction characteristics on short wavelength corrugations, 315
Silicon
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361
Sliding
micro-mechanisms of wear — wear modes, 277
sliding friction and wear of plain carbon steels in air and vacuum, 163
sliding wear mechanism of polytetrafluoroethylene (PTFE) and PTFE composites, 229
the behaviour of transverse roughness in sliding elastohydrodynamic lubricated contacts, 107
the formation of aluminium hydroxide in the sliding wear of alumina, 201
wear behaviour of i-carbon coatings, 149
Sliding speed
effect of roughness and sliding speed on the wear and friction of ultra-high molecular weight polyethylene, 331
Sliding velocity
effects of temperature and sliding velocity on the dry tribological characteristics of high purity, high density polycrystalline aluminium oxides, 351
Steel
oxidational wear modelling: (I), 179
sliding friction and wear of plain carbon steels in air and vacuum, 163
wear behaviour of i-carbon coatings, 149
Surface topography
quantitative analysis of surface topography with the use of scanning electron microscopy, 19

Thin-film disks
the role of environment in the friction of diamond for magnetic recording head applications, 79
Thin-film rigid disks
tribological studies of various magnetic heads and thin film rigid disks, 65
Topography
quantitative analysis of surface topography with the use of scanning electron microscopy, 119
Track support
the influence of track support structure and locomotive traction characteristics on short wavelength corrugations, 315
Triboloby
tribological studies of various magnetic heads and thin film rigid disks, 65
Tribology
effects of temperature and sliding velocity on the dry tribological characteristics of high purity, high density polycrystalline aluminium oxides, 351
Tungsten
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375

Vibrational spectroscopy
microscopic origins of the interface friction of organic films: the potential of vibrational spectroscopy, 263

Wear
effect of roughness and sliding speed on the wear and friction of ultra-high molecular weight polyethylene, 331
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361
the wear of tungsten carbide–cobalt cemented carbides in a coal ash conditioner, 375
Wear modelling
oxidational wear modelling: (I), 179
Zirconium
friction and wear of Al_2O_3, ZrO_2 and SiO_2 rubbed against pure metals, 361
